📍 Uttar Pradesh, India

PROFESSIONAL SUMMARY

B.Tech Electronics & Communication Engineering student at CSJM University, Kanpur, with a strong interest in Software Engineering, Artificial Intelligence, and Product Development. Experienced in building end-to-end web, mobile, and AI-powered applications including intelligent document analysis systems, hyperlocal commerce platforms, and full-stack products. Passionate about solving real-world problems through scalable software and modern AI technologies.

EDUCATION

Bachelor of Technology (B.Tech)

Electronics & Communication Engineering • CSJM University, Kanpur • 2025 - 2029 (Current Year: 2nd / 3rd Semester)

TECHNICAL SKILLS

Languages - Python • JavaScript • TypeScript • C++ • C

Frontend - React.js • Next.js • HTML5 • CSS3 • Tailwind CSS

Backend - Node.js • Express.js • FastAPI

Databases - PostgreSQL • MongoDB • Firebase • Supabase

AI / ML - PyTorch • OpenCV • YOLOv8 • RAG • LLM Applications

Cloud & DevOps - AWS EC2 • AWS S3 • Docker • Git • GitHub

Tools - VS Code • Postman • Figma

PROJECTS

AI SENTINEL INDIA

AI-Powered Legal Contract & Salary Compliance Platform

- Built a Retrieval-Augmented Generation (RAG) powered document intelligence platform.
- Automated legal contract risk assessment and compliance validation.
- Developed salary annexure analysis with AI-generated simplified explanations.
- Implemented conversational document Q&A capabilities for uploaded contracts.
- Designed scalable backend workflows for document processing and AI inference.

Tech Stack: Next.js, FastAPI, Python, PostgreSQL, Gemini API, RAG

QUICKFIX

Hyperlocal Commerce & Repair Service Marketplace

- Developed a complete ecosystem consisting of Customer App, Provider App, and Admin Dashboard.
- Implemented service booking, vendor onboarding, and repair scheduling workflows.
- Built order lifecycle management and real-time status tracking.
- Developed centralized administration tools for categories, banners, shops, and providers.
- Designed scalable marketplace architecture supporting multiple user roles.

Tech Stack: Flutter, Firebase, Node.js

PERSONAL PORTFOLIO PLATFORM

- Designed and developed a modern interactive developer portfolio.
- Showcased AI, Full Stack, and Product Engineering projects.
- Implemented responsive UI and professional branding elements.
- Optimized performance, accessibility, and user experience.

Tech Stack: Next.js, TypeScript, Tailwind CSS

EXPERIENCE

Independent Software Developer & Product Builder

2024 – Present

- Designed, developed, and deployed full-stack applications and AI-powered solutions.
 - Worked across frontend development, backend architecture, database design, cloud deployment, and AI integration.
 - Built products focused on solving practical business and consumer problems through technology.
-

ACHIEVEMENTS

- Built multiple production-ready software products before the second year of engineering.
- Developed AI-powered, full-stack, and real-world problem-solving applications.
- Created and deployed a professional portfolio website.
- Actively learning advanced Software Engineering, AI Systems, and Cloud Technologies.
